### Course overview

Masters in Early Onset Scoliosis is an interactive and collaborative educational forum, designed to incorporate a blended-learning approach that combines clinical discussion with hands-on cadaveric instruction. This course will address current treatment options such as when to fuse, MIS correction techniques, advanced pelvic fixation, rescue techniques, complex spine and rib osteotomies and addressing proximal junction kyphosis (PJK).

### Target audience

This course provides a forum for surgeons in fellowship and practicing surgeons who treat pediatric spinal deformity.

### Course objectives

After completing this program, participants should be better able to:

- Treat Early Onset Scoliosis
- Evaluate Stryker's products in a cadaveric setting

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of specific products before using them in surgery.

The information presented is intended to demonstrate the breadth of Stryker's product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use, including the instructions for cleaning and sterilization (if applicable), before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
